... with the necessary expertise

Training
Expert knowledge for balancing and diagnostics - Training can be conducted either at your facility or in our training centre.

Consulting
Consultation on balancing problems, process optimisation, rotor calculation.

On-site service
Commissioning, repair, preventive maintenance, staff training.

Balancing service
In our balancing centres we will balance any rotor on your behalf. We can even balance rotors in the installed condition.

Maintenance
Regular maintenance will maintain the availability of your machines and support your quality management system.

Upgrades
Upgrading will maintain the high performance and extend the service life of your machines.

Spare parts
We offer a large range of parts from stock, with only original parts. Short delivery for special parts.

Used machines
Purchase and sale of used machines, exploitation of old machines.

Repair
Repair of components is often less costly than procuring a new part.

Machine relocation
Dismantling, transport, reassembly and re-commissioning – a removal service by the expert.

Inspection and certification
of rotors and machines. Our laboratory service will carry out the inspections according to ISO 9001, ISO/TS 16949, VDA etc.
